Bright Teeth – Get A Brighter Smile Fast

The **Bright Teeth** system combines the whitening procedures of other products on the market with a state of the art whitening laser for faster and whiter results. This innovative product is unlike any of the others that you might find, with the addition of its new laser treatment. Your kit comes with everything you need to get professionally whitened teeth at a lower cost. Read below to find out how this product can help you get the smile you have always dreamed of.

Product Details and Contents

For one low price, you get the entire Bright Teeth system that can effectively whiten your teeth in only a matter of weeks. Each kit contains one 10cc syringe of gel for approximately 20 treatments. You have your choice of a gel that either contains 22% or 35% carbamide peroxide. This ingredient is what helps to whiten the teeth when it become oxidized, but if you have sensitive teeth and gums you will want to pursue the lower percentage. Additionally, your kit will come with two thermoforming mouth trays, a 3cc syringe of remineralization gel, and a laser light. The remineralization gel helps to revitalize the tooth enamel that might be damaged during the whitening process. The thermoforming trays automatically create a mold of your mouth for home, in which the whitening gel is placed and applied to your teeth for 15-20 minutes per day. The Bright Teeth process is one of the only systems to use a whitening laser light to help speed up the whitening process.

Advantages

This product is safe, uses kosher glycerin with no animal by-products, and can be purchased with a lower percentage of carbamide peroxide for decreased teeth sensitivity. The cost is significantly lower than a whitening procedure at a dentist's office, and it is the only home whitening process that utilized a laser whitening light.

The product is readily available online through a secure Internet checkout procedure, and does come with a money back guarantee in case you are not satisfied. The fact that the bright teeth solution can produce results in as little as two weeks, only makes it that much more appealing.

Disadvantages

Even with the lower percentage of carbamide peroxide, some people do still experience teeth sensitivity when using this product. Also, the cost is slightly higher than other systems on the market, but this could be due in part to the laser that is available with this kit. Another small disadvantage is that it takes 15-20 minutes to complete an application of the Bright teeth system, but this is counteracted by the results that you gain.

Price

The price for about a 20 day supply of the Bright Teeth system is \$70 with the laser light, and \$50 without it. Although you do not need the light to get whitening results, it does speed up and improve the process.

Who Would Benefit Most From This Product?

Anyone looking to whiten their teeth naturally from home would benefit from the Bright Teeth system. With its innovative use of laser whitening light, it is one of the best products on the market. Its higher cost is worth the added benefits that it provides, and the money back guarantee means that consumers have nothing to lose.
