NovaWhite – A Complete Teeth Whitening System

[NovaWhite](#) is a Singapore based company that specializes in providing teeth bleaching products to consumers. Their products produce a whitening quality that is similar to the one you would experience from a professional bleaching service, but there is a higher cost involved.

Product Details and Contents

The NovaWhite system is a complete teeth whitening system in one. It has everything you need to get professionally whitened teeth from the comfort of your home. Product contents include:

Regular Kits

3 Boil and Bite Trays

Three 3 ml Syringes of Bleaching Solution

A Gel Applicator Tip

A Tray Case

Premium Kits

Six 3 ml Syringes of Bleaching Solution

Two Impression Trays

Three Sets of Putty

Three Thermoform Trays

Two Gel Applicator Tips

Two Spatulas

A Tray Case

Advantages

There are several advantages of the NovaWhite system. For starters, the system is fairly detailed but comes with easy to follow instructions. The complexity of the kit ensures that it is more effective than simple paint on products, but is still easy enough for anyone to handle.

The results are guaranteed, and the product can be ordered easily online through a secure website. You control how little or how much the teeth are whitened, and there is no sensitivity felt after the treatment, which can occur with other products as well.

Disadvantages

Since the application process is more in-depth and complex, it can take quite a while to apply the NovaWhite solution. Considering the results that can often be seen though, this is not really too much of a disadvantage. The cost is higher than other products on the market, but the results may be seen faster.

Price

The SuperNova supreme kit costs \$140 and the additional whitening gel can be purchased at a cost between \$50 and \$110 depending on the size. While this is more costly than other whitening products on the market, the product does come with a guarantee and produces good results.

Who Would Benefit Most From This Product?

Anyone looking for professional looking teeth whitening that can be done from the comfort of your home would benefit from the NovaWhite system. The ideal consumer would also have to be willing to undergo the daily application procedure, since it can be lengthy. If you are looking for a complete system that provides results, and the higher cost is not a problem, then you won't likely find many systems that are better for you than NovaWhite.
