Teeth Whiten Tips – Get Whiter Teeth At A Lower Price

When most people hear the name "[Teeth Whiten Tips](#)," they usually think that the product is a guide or book on how to achieve whiter teeth. This is wrong though Teeth Whitening Tips is actually an innovative product which can effectively remove hard set stains from your teeth in a week or less. Below you will find more on this product that is growing in popularity within the teeth whitening market.

Product Details and Contents

The Teeth Whitening Tips product is an easy two step process. There are six applicator swabs and a container of powder within each kit. You dip the liquid filled swabs into the powder, and then apply it to your teeth as directed. This is a simple process that anyone can take advantage of quickly. The ingredients within the swabs and powder include:

1. Liquid Filled Swabs
2. An Undisclosed Whitening Solution
3. Glycerin
4. Peppermint Flavoring
5. Water FD&C Blue Coloring
6. Methylparaben
7. Propylparaben

Powder Formula

1. Magnesium Peroxide
2. Aluminum Trihydroxide

It is important to mention that without the ingredients that are within the powder, the whitening solution would not work at all. The Magnesium Peroxide is used to release oxygen so that the liquid filled swabs can eliminate stains. The Aluminum Trihydroxide on the other hand buffs your teeth and makes them shine.

Advantages

One of the main advantages of this product is that it is virtually mess free, and contains peppermint flavoring which is preferable to the foul tasting solutions of other products. The Teeth Whitening Tips system is also extremely effective and fast acting, and you can see results in only a matter of days. The cost is lower than other products as well, and the product has been proven to remove plaque too.

Disadvantages

Children under the age of 12, pregnant women, and those already experiencing medical problems are not allowed

to use this product. The product also will need to be reapplied on an ongoing basis as it does not whiten teeth indefinitely.

Price

The price for a kit of 6 applicators and powder is \$30. This is significantly lower than other products on the market, and there is often a bonus offer that will provide you with a two month supply for free too.

Who Would Benefit Most From This Product

A consumer who is in search of a low cost alternative to other products that also comes with a money back guarantee would benefit well from this product. If you are in search of a whitening product that is effective and do not have any preexisting conditions and are not pregnant, then this is one product which you should consider in order to get the pearly whites you have always dreamed of.
