Teeth Whitening Express - Executive Whitening System Review

Teeth whitening products are the talk of the town these days when it comes to trying to achieve the perfect smile. There are all sorts of toothpastes, tooth strips, and teeth whitening kits available in the market that can help in achieving whiter and cleaner teeth. But if one really wants a process that is effective and quick, then the executive whitening system by [Teeth Whitening Express](#) is the way to go.

Teeth Whitening Express is a service that is solely dedicated in helping you gain a whiter and cleaner smile. The service doesn't even require the patient to visit a dentist because with the executive whitening system, all you really need is the kit that is available from the company. Teeth whitening can be very expensive and a visit to the dentist can set one back hundreds of dollars.

How Is This Possible?

You might think that there is nothing better than just brushing your teeth on a regular basis and using whitening strips once in a while. What you might not know is that there is a faster and more effective way to whiten and clean your teeth. This is made possible by using a process that involves tooth trays.

These trays, or molds, can fit into your teeth. Actually, it is your teeth that can fit into these trays. By inserting a whitening gel into these trays and then wearing them on your teeth, you will have a perfect smile in a short amount of time since the gel is evenly distributed and not a drop spills since the tray holds all the gel against your teeth.

What Is This Executive Whitening System?

The [Executive Whitening System](#) is basically a home tooth whitening kit that will definitely assure you a whiter and cleaner smile with correct and regular use. The kit that is made available by Teeth Whitening Express contains all of the items that one will need in the tooth whitening process.

The items found in this kit are:

- 6 syringes of highly effective whitening gel, trays with a slimline protective tray case
- metal syringe application tip
- and a teeth whitening shade guide

One of the best things about the Executive Whitening System is that they also include 6 extra free syringes on top of the 6 that are already provided in the home kit.

Why Whitening Trays?

Basically, the trays are made to fit your teeth exactly, which makes the whitening process simple. Also, if you use strips instead of trays, you may have experienced something known as striping because the gel on strips is not evenly distributed. The trays are there to hold all the gel against your teeth without any spills and this means that the ingredients reach every contour of your teeth.
