You Can Have A Brighter Smile In As Little As 4 Days

There are all sorts of toothpastes, tooth strips, and teeth whitening kits available on the market that can help you get whiter and cleaner teeth. But if you really want a system that is effective and quick, then the executive whitening system by Teeth Whitening Express is the way to go.

Teeth Whitening Express specializes in professional teeth whitening products. You will achieve the same professional results like as you would from your dentist at a fraction of the cost.

How Is This Possible?

The fastest and most effective way to whiten your teeth is to use a [teeth whitening system](#) that uses tooth trays. These trays, or molds, can fit into your teeth. Actually, it is your teeth that fits into these trays. By inserting a whitening gel into these trays and then wearing them on your teeth, you will have a perfect smile in a short amount of time since the gel is evenly distributed and not a drop spills since the tray holds all the gel against your teeth.

What Is The Executive Whitening System?

The Executive Whitening System is basically a home tooth whitening kit that will definitely assure you a whiter and cleaner smile with correct and regular use. This teeth whitening kit contains all of the items that you will need in the tooth whitening process. The kit includes 6 syringes of highly effective whitening gel, trays with a slimline protective tray case, metal syringe application tip, and a teeth whitening shade guide. One of the best things about the [Executive Whitening System](#) is that they also include 6 extra free syringes on top of the 6 that are already provided in the home kit.

Why Teeth Whitening Trays?

Basically, the trays are made to fit your teeth exactly, which makes the whitening process simple. Also, if you use strips instead of trays, you may have experienced something known as striping because the gel on strips is not evenly distributed. The trays are there to hold all the gel against your teeth without any spills and this means that the ingredients reach every contour of your teeth.

The Executive Whitening System includes the whitening gel in the syringes that are glycerin-based and can provide pure bleaching. This means that the whitening starts and doesn't stop as long as the gel is in contact with your teeth. Wearing these trays anywhere between 1 to 3 hours a day will ensure whiter teeth and a brighter smile.
